With this material was a form letter which lacked personal address but stated among other things "In response to your request we are forwarding the enclosed material."

Contact had not made any such request. Having lived a few years behind the iron curtain, he had during his stay here made public talks against the Soviets and exposed many of their practices.

Contact from previous experience in Soviet countries was disturbed and his reaction was "how did the Polish Embassy know he applied for citizenship?" While it might have been a coincidence that the material arrived shortly after he applied for citizenship he suspected the two acts were related.

Contact's first reaction was to return material stating he had not requested it - but on considering felt this would confirm his present address so destroyed letter and turned material over to us.

Local office of the Immigration and Naturalization Service has been advised in detail of this matter.

Material listed below is for permanent retention:

- a. Envelope in which material was received.
- b. Constitution of the Polish People's Republic
- c. Polish Journey
- d. German Revisionism: Its Threat To Peace
